

Industry:
Automotive

Company:

One of the leading designer, manufacturer and marketer of high-end tools and equipment for professional use in the transportation industry including the automotive, heavy duty, equipment, marine, aviation, and railroad industries.

4-Serv Services:

Application Development and Staff Augmentation

BUSINESS CHALLENGE

- Reengineering of Web based User Interface Implemented using Adobe Flex to Angular Framework required partner assistance with application development and staffing
- Lack of internal resources with knowledge of Angular UI Framework
- Adobe Flex framework was discontinued, and the industry demanded a more flexible UI framework that can scale to the increase in demand

4-SERV SOLUTION

- 4-Serv helped develop a new Angular based User Interface and phased out the Adobe Flex based User Interface
- User Interface was engineering with very minimal changes to the existing backend API system.
- Agile process was followed to deliver the project with robust iterative development
- Mentored and coached internal development team on Angular Framework

RESULTS & BENEFITS

- The new user interface was well received by the customer and was unanimously adopted by customer's stakeholders. The user interface gave a consistent view across all the dealers, where widespread inconsistency previously existed
